Gerald Wingrove : Complete Car Modeller 2 before purchasing it in order to gauge whether or not it would be worth my time, and all praised Complete Car Modeller 2:

How many times can you get instruction from a master? At first glance it may look like the stuff in this book is darn near impossible, but he explains everything. All you have to do is do what he says. When you look at a model ship and you see the seemingly endless rigging, it looks daunting. How did he do that? Well, it was done one knot at a time. If you take a similar approach to this book you will see your skillset increasing and your models coming together. I bought Vol 2 also. They go well together, and book 2 has plans for a Bugatti. You

can build your version of an actual Wingrove model! With these two books you can see what the master sees, do what the master does, and with judicious application of patience and diligence, get the results the master does. Very valuable to me. Saves years of my own trial and error.0 of 0 people found the following review helpful. More instruction from a masterBy mmthraxWhat I like about this book is that it is written in the first place. Rx for AMS (Advanced Modeler Syndrome)By CustomerIf you thought you were an experienced modeler, be prepared for a humbling experience. Gerald Wingrove built large scale classic autos to a standard seldom seen this side of perfection. Several models are discussed in depth, beginning with simple shapes combined to duplicate complex parts assembled to duplicate the originals in exquisite detail. Of interest to me are the detailed instructions to make wire wheels.

In this follow-up to the successful Complete Car Modeler 1, Gerald Wingrove takes the aspiring modeler to the next level by describing in detail the process and skills involved in the construction of his world-famous 1/15 scale models. His example subject throughout the book is the fabulous Weinberger Bugatti Royale. Thus the re-creation of the Royale, including all engine and chassis detail, is revealed step-by-step. Includes full plans for the Bugatti Royale not previously published.

About the AuthorGerald Wingrove MBE has been making models commercially for many years. He made his first car models - for Lord Montagu of Beaulieu - in 1968. He has written a two-volume book on how to make model cars and an album of his 1/20-scale models. Resident - Digby, Lincolnshire
