The best for your south florida adventures By Olivia I was looking for ideas for pages because we are going to do a family reunion at Disney. This is a once in a lifetime event and I wanted to scrap it for the little ones. I took out so many books from the library and pages through dozens of books at the craft store. Then I came across this gem. Practically every layout begs to be re-defined for our pages. The book starts out with beach pages and has a particularly nice "Cousins are Friends" page that will work quite nice for our extended family. The outings section is 90% Disney layouts, including what to do with your Epcot travels and Animal Kingdom. It also has a few Sea World layouts for that side trip. In the outdoor section it has camping pages that work well if you are staying at Ft Wilderness. Also a great spelunking section, which I have never

seen before. While I checked this book out from the library, I now want to buy a copy for my collection as it is a wonderful layout resource. As a beginner I did not find the very short and basic layout directions to be too difficult. The book names the manufacturer of the items used and probably assumes you will be consulting the various directions or just using your own creativity to alter the layouts. 25 of 25 people found the following review helpful. Great idea book! By Elizabeth G. A great addition to any scrapbooker's collection! When I first saw this book I was just amazed that I had finally found a book dedicated to vacation scrapbook pages. And after opening it, I was thrilled that it didn't disappoint like so many other scrapbook idea books I've seen in the past. Anyone needing great examples for vacation layouts should definitely pick up this book. While the book doesn't provide much in written tips and ideas it does provide pages upon pages of beautifully designed layouts. These pages will have your creative juices flowing in no time. Happy scrapping!
