"Creatures Of Legend" coloring book is a facinating resource of mythical beings By Lori Parker Here are 50 pages packed with legends about creatures from many cultures. Each detailed drawing is captioned with a brief biography answering the historical who/what/where/when/why/how. Many are horrific, but don't judge a creature by its cover; some were friends to humans that you'd not have expected. Beware the intricate sketches, if this will be used for an actual coloring book and not simply a fun read or mythological resource. Some drawings will require patient use of colored pencils to complete, but not all will. The main benefit in this paperback is the reading, and I recommend it for ages 10 and up. Who you should buy this coloring book for: * Child age 10 and up who loves dragons, unicorns, or other mythical creatures * Anyone interested in video games or group gaming relating to legends * Someone who collects winged figurines (and doesn't think dragons are always evil) * A high school student (Tell them to use it for research, if you get a funny look) Other fun and educational

Perfect balance of coolness and cuteness. By WebDeveloper Coloring books are a great activity for or with your kids. But in most cases, after you carefully color the picture you're left with something you spent a lot of time on, but doesn't really look like something you'd want to keep or show off. Not so with this one. The illustrations are really a cut above. And they are detailed enough to appeal to older coloring book fans too. In these pages you will find fantastical creatures from all over the world. Meet those you may already be familiar with like Dragons, Unicorns, and Gryphons. Be surprised at others you may not have met before, like the ferocious Wyvern from Europe or the mystical Itsumade from Japan. There is no right or wrong way to color, so let your choices bring these ancient animals to life.
