Julie Sharp : Creepy Creatures before purchasing it in order to gage whether or not it would be worth my time, and all praised Creepy Creatures:

Following the success of Fantastic Fairies, Julie Sharp has created a new world of unusual characters to delight children and adults alike. There's Ookpik the adorable alien, sweet Scant the Ant, bug-eyed Bobbly Nobbly, fuzzy but ferocious Snork the Dragon, and 13 others all constructed from common craft supplies like pipe cleaners, pom-pom balls, and yarn. Customizable accessories complete their creepy world, such as skateboards and bicycles, swords and armor, glasses, hats and scarves, and other whimsical items. Or, build the Cave, Swamp Hut, or Bonsai Tree House for them to live in—imagination is the only limitation. The instructions are highlighted with more than 500 color photographs and illustrations, making it easy to create and enjoy the 30 projects included.
