If you are handpiecing this you will need to make some changes. This is for machine piecing and you cannot go buy the directions in the book for hand piecing which is what I am doing. i am making 2 quilts in the book right now. I will post pics when finished. I am almost done piecing the first quilt. I am doing the girl version of the cover quilt and they want you to cut off a big chunk of one side to square it up before you put on the borders. It goes against everything I was taught to have untied ends. Also do not go buy the yardage required. It asks for twice the amount required for backing. I had noticed this on the last quilt I made. Then they pieced the back. No need as all the quilts are small enough to use any material without piecing. The designer said the publisher required it so the quilt could fit on a machine quilting frame. I also added a bit to the borders on mine to

make it a bit bigger. I did not strip piece my top either as I believe in tied ends on every piece. It has taken me 2 weeks to piece my top and all I have left to do is make my flowers for the borders and I will start on butterfly kisses. I will update this review when finished with both quilts. 0 of 0 people found the following review helpful. Okay By SoCal This book is okay. 0 of 0 people found the following review helpful. Five Stars By Lorena Gonzalez Great children quilts

Fit quilting into your busy life; these projects are easy enough for beginners and enticing enough for experts.

Cute Quilts for Kids by Kristin Roylance has 9 different children's quilts that put a little spin on traditional quilts. The book also teaches basic applique and embellishing techniques, even how to put on binding. The instructions were clear and the pictures great. The Ladybug Landing quilt was just too cute to pass up, so [I] gave it a try. I'd had some ladybug fabric in my stash for a while, and this was the perfect pattern for it. The pattern was very straightforward, and I was able to finish the quilt in a couple of days, which was a refreshing change of pace for me. Since I'm becoming more of a contemporary quilter, and like applique too, these quilts really appealed to me. --Mary at Mary Manson Quilts, March 2014

About the Author: Kristin's first introduction to quilting came while visiting her grandmother's home as a young child. She can remember sitting under a quilting frame, carefully pushing a needle up for her sister to pull through from the top. They were quite the team! She remembers going home with bandages on each and every fingertip, but she still couldn't wait to try it again. Her next notable quilting experience also included bandages...this time with a trip to the emergency room. Rotary blades can be very dangerous! She's learned a lot since then and rarely requires Band-Aids these days. Kristin started her pattern company, Cute Quilt Patterns, in 2008. She's enjoyed the many friendships that come from daily interactions with fellow quilters. She loves having the opportunity to share her designs and see the creativity the designs inspire. Kristin feels blessed to live on a beautiful hillside of the Wasatch mountains in Utah with her amazing husband and six energetic, quilt-toting children.
