Good simple directions.Very good clear photos of each project. Only criticism is the author should have put more info on type of needle to use and mentioned about thread tension and stitch size. A person inexperienced would have no idea about need to perhaps use jean's needle to go through thicker fabric or leather and tension may have to be adjusted or that could thread will break. So if you are beginner machine sewer consult your machine manual for suggestions for the above.0 of 0 people found the following review helpful. Great book!!By K. WoodfordeI had this book already, so I knew it was great to start. My mum saw my copy so we searched and bought her a copy too. Great book with lots of great ideas that can be incorporated into scrapbooking or card making :)4 of 5 people found the following review helpful. A veritable emporium of ideasBy S. FishburnFrom the clever concept of pinking shearing the edges of the pages of yoursrapbook, altered book, handmade book (and THIS book is the perfect example of a commercially published, pinking shear-edged volume) to an amazing tour de force of a traveling journal kit created by Ann Mabee and shown on pages 52-53, this is a can't-go-

wrong book you must include in your own library if you have any inkling that you may now, or at any time in the future, wish to incorporate fabric and all its accoutrements into your scrapbooking bag of tricks.

Beautifully designed and illustrated book offering countless ideas for using fabric for designing scrapbook pages of all kinds. A must-have for the serious scrapbooker!!
