I have Dale Nish's book and compared the two. Both give great insight into how and why they do the steps to complete the project. The book also gives very good advise and instruction on making jigs and mandrels to hold the work. Worth the price.2 of 2 people found the following review helpful. Bird house magicBy Murphy101Great book, i had seen one of friends demonstrate turning a bird house at our local chapter in Dublin and was fascinated at how detailed and delicate these bird house's could be. My first attempts at turning birdhouse's could have been used as hurricane shelters for penguins they were so Strong (thats my

interpretation!). My pals wernt so polite but having read Dick Sing's book and changed my pals things are definitely looking better. Well worth the few dollars for the pictures alone as they are superb for the detail work.0 of 0 people found the following review helpful. This is a great book to followBy Blacksmithdick is known for his small work. This is a great book to follow.

World-renowned woodturner Dick Sing takes you through all the steps needed to create delightful and decorative miniature birdhouses. Starting with a basic birdhouse, Dick illustrates how to set up and turn the body, roof, perch, and finial. Clear, step-by-step instructions show wood preparation, proper use of equipment and tools, and sanding and finishing techniques. Additional chapters show how to add inlays and other intricate details; create birdhouses from rejected pipe blanks and branchwood; turn a natural edge roof; make a tiny, charming, birdfeeder; and fashion an elegant stand on which to display your finished treasures. Includes design ideas and techniques, plus a gallery of wonderfully diverse birdhouses to inspire your creativity.

About the AuthorA professional woodturner since 1989, Dick Sing resides in Illinois with his wife, Cindy. Along with teaching classes and one-on-one instruction, he provides demonstrations for businesses and clubs all across the country. This is his ninth book on woodturning.
