A big disappointment. I wouldn't have minded so much if it had only been \$5.00 or so, but it was a big ripoff at \$22. Two thumbs waaaaay down on this one.1 of 1 people found the following review helpful. WonderfulBy Thomas LamanIf your a blacksmith and work on a budget

then this when built will give you economical gas forge results and is simple to put together very good DIY project.

How to design and build a digital temperature controller for any gas-fired blacksmith forge.
