Self-directed learning for children By Rob Whaley After having worked with teachers for 30 years, I can say confidently Mr. Barr's book is a sterling example of promoting self-directed learning with children. It strikes a perfect balance between direct instruction by the author and creating conditions for children to initiate their own learning and strive for independence. And besides, it's fun! I would recommend this book for any parent or teacher trying to foster creativity in children from early childhood through middle school. 2 of 2 people found the following review helpful. The book shows step by step instructions that are easy to follow and easy to understand. I have no natural talent and jokingly tell people I can't draw a stick man in proportion. I am so proud of myself now! The best part of this book is how much fun you will have. I
