It is great if you want to see the various styles of bows, arrows and quivers used by the different tribes of North America. If you are into making bows, arrows, and quivers, it will serve as a great source of inspiration, but it will be up to you to figure out how to duplicate them. The information is very

sparse; usually just what material the item was made from and some information on dimensions and/or thickness. Still, if this subject is of interest to you, it is fascinating to look through. 0 of 0 people found the following review helpful.
