A friend found at local store, I couldn't wait to get my own copy. Since receipt have gone page by page through book 3 times admiring the variety. Birds, butterflies bees compliment all kind of flowers. Some fine line and lightly shaded others with very dark components. Drawings go completely to edge of page full spread but book can be flattened out to work in. No border, no perforations, 2 sided pages.0 of 0 people found the following review helpful. except for having too much black inking on them. It overwhelms some of the pictures. Had I known that it wasn't printed on one side and it was so dark I would not have bought it. 2 of 2 people found the following review helpful. The pages are fine, but I'm debating sending it back and trying ...By Sunspot I love the artwork! More mature flower designs than I usually see... all different sizes that spread out over 60+ two-page layouts. Sometimes just one or two flowers per page. Realistic looking birds and butterflies... and a bee to find on every page. The book is about 1/2" thick with thicker pages and intricate designs... only a few with backgrounds. I'll say it again... intricate! However, eh-hm, the designs go all the way out to the edges and into the binding, the printing is on both sides of the paper, and no perforation. And while the birds and butterflies are cool, the shading is often too dark so little color can be applied to them. Still, I want this book to do "washes" and shading and blending of all kinds of flowers. There's also a variety of lighter and darker outlining and shading. Lots of content and not too cutesy.

Enjoy a bouquet of beautiful pictures to color in. Relax, unwind, and free the mind as you color stunning flowers and follow the hidden bee that buzzes from page to page!
